

We build a score-based search criteria to generate this dataset of online tweets around sensitive covid-19-related content against the Asian population.

The search function looks for special keywords (listed below) in the tweets and assigns each tweet a score based on the number of keywords in it. For example, if there is a tweet that has 5 keywords in it, it will get a score of 5. and if there is only 1 of the keyword in a given tweet, it will get a score of 1. It is important to mention that duplicate keywords are counted only once; i.e., the score is based on unique distinct keywords. Also, only the tweets which contained one of the words {china|chinese|Asian|cpp} have been included in the query.

It's good to mention that before calculating the score for each tweet, both the tweet body and keywords have undergone preprocessing steps:

1. The keywords were lemmatized
2. Each tweet body was preprocessed for noise removal (see the code associated with this file for more details)
3. Each tweet body was lemmatized

Note:

1. Some keywords were treated as pairs of words such as "wet-market", "eat-animal", and "bio-weapon".
2. The code for extracting dataset version 2.0 is listed in the same directory with the name "extract\_tweets.py"

---

## Keywords

### Cultural Stigmatization

=====

bat, animal, eating, eat, snake, dog, rat, soup, cat, wild, critter, swine,  
pig, meat  
market, wet  
kill, killer, killed, killing  
madeinchina  
plague, fatality, threat  
guilty  
pay  
boycott

## Political Stigmatization

=====

madeinchina

lie, lied, liar, cover, covering, silenced, trust, trusted, cover-up,  
coverup, cover, conceal, concealed, deception, transparency, hoax

biological, weapon, bio

war, warfare, biowarfare

lab, leaked, deliberately

stealing

dictator, tyranny

communist, posed, threat, fear

guilty

guard, army, military

murderer

boycott

imprisoned

sanction

genocide

Uncertain list:

crippling, died, censorship, freedom, fight, fighting, fuck, fucking, shit,  
bastard, evil, sewage, racism, racist, suffering, blame, blamed, threaten
